International School Delft will open Secondary School

In August 2019, the International School Delft will open a secondary school. Following the successful development of the International School Delft Primary School over the last five years, international students in the Delft area will now be able to continue their education at secondary level.

Programmes

The International School Delft will seek to offer the full range of the International Baccalaureate (IB) Programmes. The Primary School already offers the International Baccalaureate Primary Years Programme (IB PYP). The Secondary School will start by offering the first two years of the International Baccalaureate Middle Years Programme (IB MYP) for students aged 11 to 16 years. In the coming years, the school will expand to offer all years, adding the International Baccalaureate Diploma Programme (IB DP) as well. International School Delft will then become the third school in The Netherlands and the only school in the region to offer the complete International Baccalaureate Curriculum for students from 4 to 18.

Facilities

The new secondary school will be temporarily accommodated in an existing building at Colijnlaan in Delft, in the immediate proximity of Stanislascollege, allowing for joint activities with Stanislas students.

The building will be converted into an attractive learning environment with all facilities required for the MYP inquiry-based learning, such as a science lab, a design studio and a media centre. This building will allow for initial growth and will be able to accommodate 150 students.

Plans for a permanent new building, to be located near the primary school, are already under way. The new building will be designed to take into account the school learning concept and will be able to accommodate 450 secondary students.

Ambition

It is the ambition of the primary and secondary school boards to jointly develop the International School Delft into an attractive and high-performing international school for students aged 4 to 18 years. Being located in Delft, gives the school an unique opportunity to seek a close connection with the TU Delft, stimulating innovation, design and technology and incorporating this into the curriculum in a natural manner.

The service element in the curriculum will allow our students to contribute to the Delft community with its traditions combined with its international mindset.

School Fees

The school fees for the year 2019-2020 will be:

School Fee MYP year 7 and 8	€ 5,700
Registration Fee	€ 250
<i>non-refundable</i>	
Deposit	€ 500
<i>refundable, conditions apply</i>	

For further information, please see our Standard Terms & Conditions 2019-2020.

Admissions

For the year 2019-2020, the school will welcome students for MYP years 1 and 2. The general criteria for admission are: the student has a non-Dutch nationality/is a foreign passport holder and one of the parents/legal guardians is employed in The Netherlands; or the student has Dutch nationality and has lived and attended school abroad for at least two years as one of the parents/legal guardians was stationed abroad; or the student has Dutch nationality and has a parent/legal guardian (with whom the student will be living) who will be stationed abroad within two years. One other condition is that the MYP school programme should be designed to fit with the student's needs and the student should benefit from the programme. The school will provide students with a continuous education from age 4 - 18, along with on site pre-school provision.

inspiring learning for bright futures

Staff

The staff are well-qualified and energetic educators. They are all fully committed to international education and actively subscribe their role in the local and wider community.

The educators have sound academic qualifications and demonstrate a commitment to the school as a learning and living community.

Stanislascollege & Lucas Onderwijs

The Secondary School will be linked to Stanislascollege Westplantsoen, a well-established Dutch secondary school, in Delft. Stanislascollege has a tradition in international mindedness, cultural awareness and performance of excellence and was awarded the label 'excellent school' by the Dutch education authorities in January 2018.

This school is governed by the Board of Stichting Lucas Onderwijs, a strong educational group with primary and secondary schools in the region.
